# AI Job Market Analysis: Roles, Salaries, Experience, and Work Arrangements

## Dataset Summary

Observations: 50,000

Variables: 21

Years represented: 2020 to 2026

Countries represented: 6

Standardized job titles: 6

Experience levels: 3

Work arrangement categories: 3

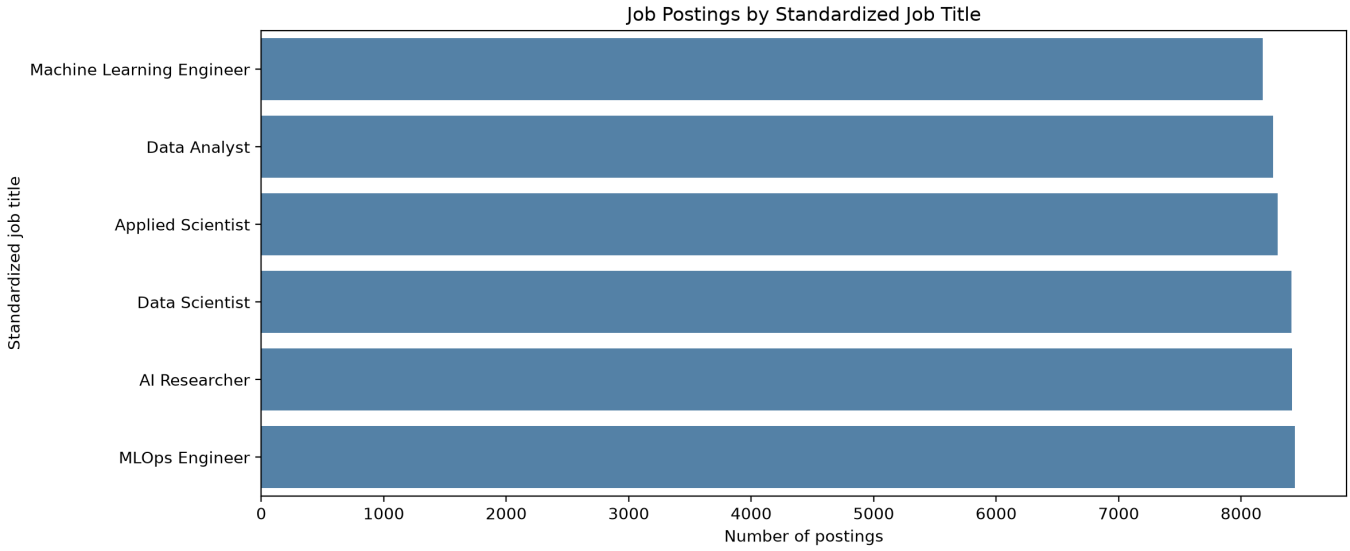

Rows with nonblank skills: 2,050 (4.1% of all rows).

## Summary Statistics

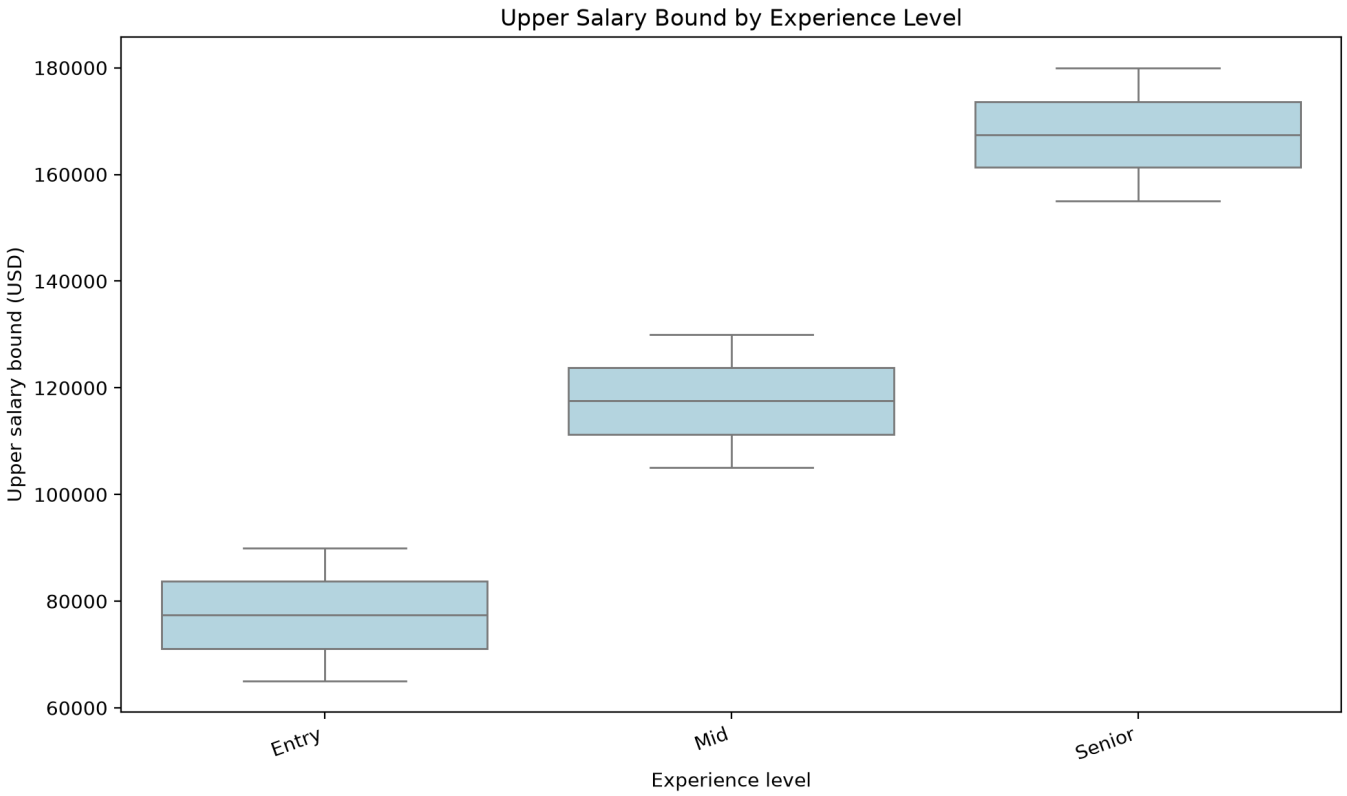

| Measure | Mean | Minimum | Median | Maximum |
|---|---|---|---|---|
| Minimum experience (years) | 2.3 | 0.0 | 2.0 | 5.0 |
| Salary range lower bound (USD) | USD 100,871 | USD 50,000 | USD 97,505 | USD 154,999 |
| Salary range upper bound (USD) | USD 120,858 | USD 65,000 | USD 117,604 | USD 180,000 |

Salary minimum and maximum are the listed lower and upper bounds of the posted range; they are not actual earned salaries.

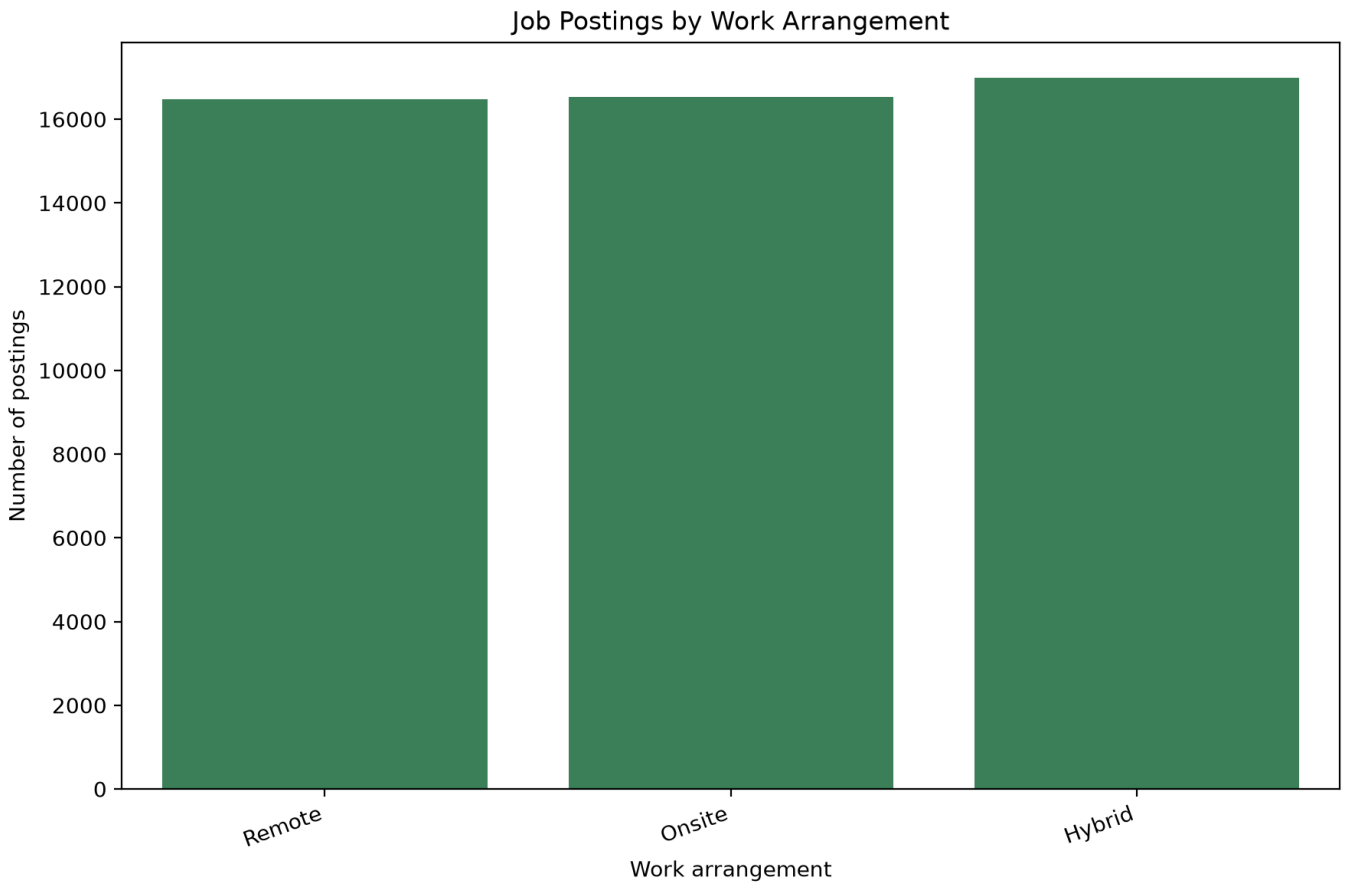

# Job Postings by Standardized Job Title

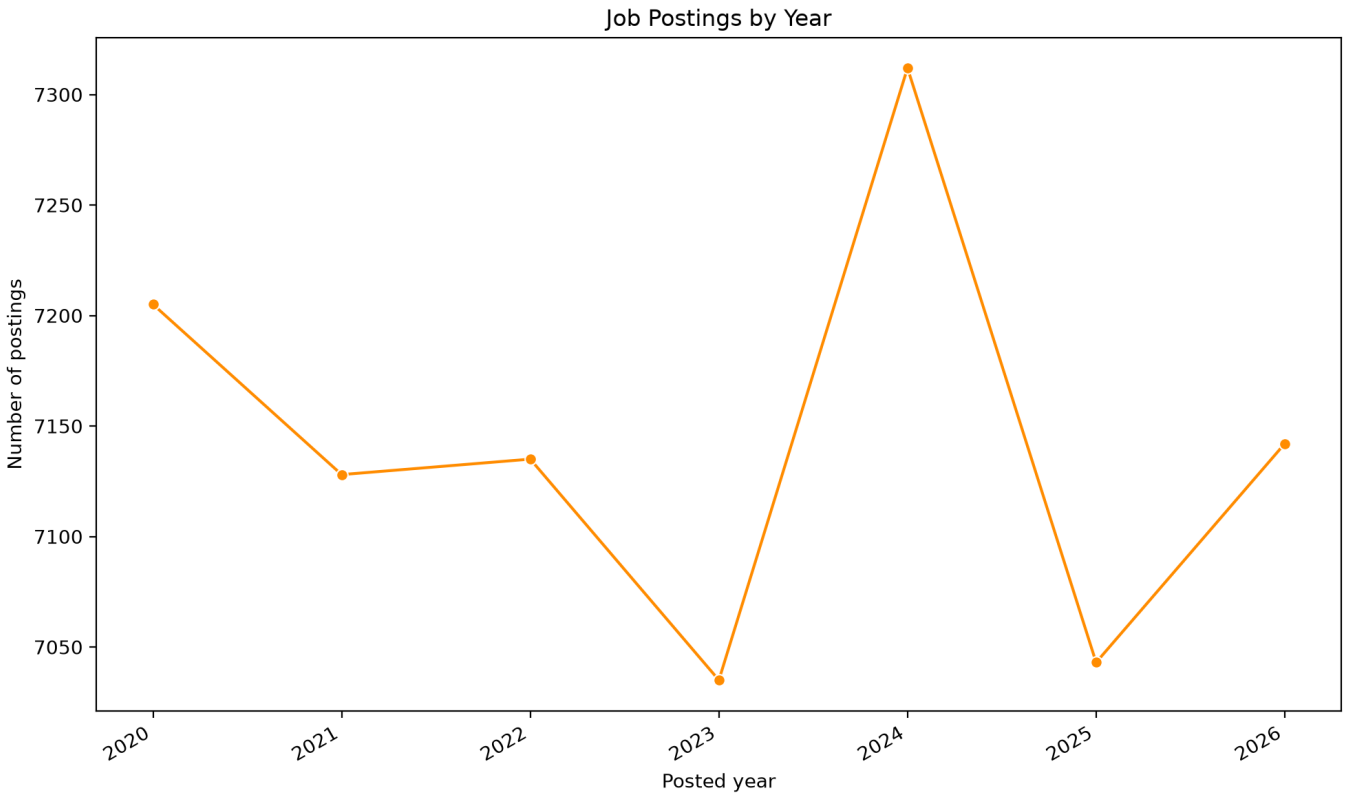

## Upper Salary Bound by Experience Level

## Job Postings by Work Arrangement

## Job Postings by Year

## Key Findings

Most frequent standardized title(s): MLOps Engineer (8,439 postings).

Experience level(s) with the highest mean upper salary bound: Senior (USD 167,496).

Most common work arrangement(s): Hybrid (16,984 postings; 34.0% of postings with a nonblank work arrangement).

Year(s) with the most postings: 2024 (7,312 postings).

## Limitations

Posting frequencies and annual counts describe this dataset, not verified total market demand or employment growth. The dataset does not establish market representativeness or causation, and does not confirm whether the latest year is complete.
